

Edoft

A Light weight School

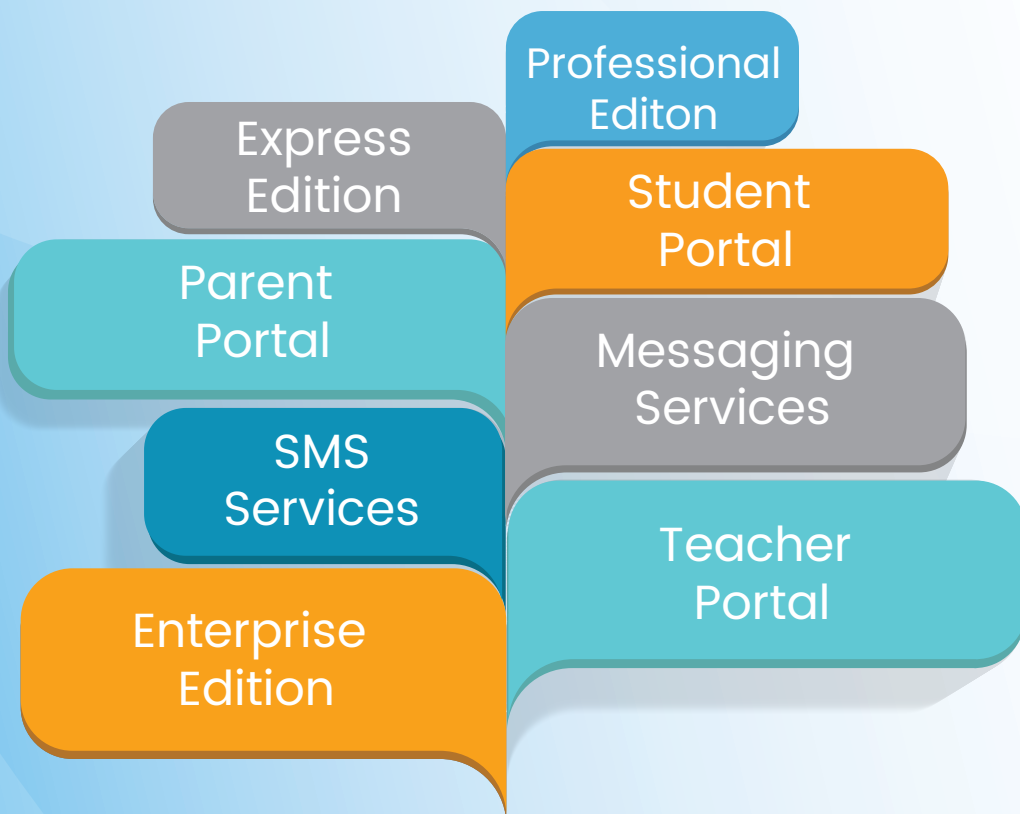

Management

EDOFT is a light-weight yet highly sophisticated and feature rich modular application that allows simplified and comprehensive management of all major Enterprise functions under one umbrella. The system provides up to the minute reliable information allowing management to better control, monitor and fine tune all processes, as well as make crucial and timely decisions. An impressive array of built-in reporting reduce the probability of inaccurate speculation, human errors and wasted resources. With a host of user friendly tools, business operation management has never been easier. All these factors synergistically combine to generate quality in product, profitability and peace of mind!

EDOFT offers a flexible modular design which may be implemented individually or as a complete system.
